EDUCATION

Bachelor of Science in Information Technology,   May 2020 - Jun 2023
B.N.N College, ***CGPI - 9.00***   *Mumbai, India*

EXPERIENCE

Comunus Technologies Pvt Ltd.   Aug 2023 - Current
Frontend Developer (**Angular**)   *Thane, Mumbai, India*

- Developed and maintained responsive web applications using Angular for dynamic user experiences.
- Collaborated with cross-functional teams to integrate backend services, ensuring seamless data flow.
- Implemented Angular features such as components, services, and directives to improve application functionality and performance.
- Worked on the frontend and integrated backend services of **Aquasoil**, an agriculture-focused application that used for **financial analysis, plot mapping, and gross profit** analysis based on data that consists of crop cultivation, soil and water parameters, customer demand, and financial calculations for farmers.
- Developed a **desk booking system** to allow users to reserve office spaces, manage bookings, and check availability in real-time. Implemented interactive features such as desk selection, floor maps, and calendar integration for a seamless UX.
- Developed a cross-platform **HRMS** application using Ionic to manage employee data, attendance, payroll, and leave management.
- Technologies used: Angular, Ionic, Ag-Grid, Chart js, Typescript, MaterialUI, SCSS.

PROJECTS

Anime Atlas ⬡ ↗ | Angular, Material UI, Rxjs   May 2024

- Developed a comprehensive anime web application that centralizes **Anime and Manga** information for users.
- Integrated instant **search functionality**, personalized recommendations, detailed casting lists, news about related with anime and multimedia **(trailers, news)** for enhanced user experience.
- To improve the performance of an application that handles HTTP requests and responses using an interceptor.

Spendwise ⬡ | Ionic, Capacitor   May 2023

- Developed a native mobile expense tracker app to help users manage and track their daily, weekly, and monthly expenses.
- Implemented intuitive features for adding, categorizing, and analyzing expenses through a user-friendly interface.
- Utilized Ionic framework for cross-platform compatibility (**Android**), ensuring seamless performance and consistent design.

TECHNICAL SKILLS

Web Development	HTML, CSS, Javascript, Angular, Typescript , ReactJS, Scss.
Android Development	Ionic framework
Other Languages	Python, SQL, MongoDB
Developer tools	Git, VS Code, PyCharm, Android Studio

ACHIEVEMENTS

- Solved over 300+ DSA problems across various platforms.
- Codechef *(1200+ rating)* [Profile ↗]
- Leeting 1500+ rating[Profile ↗]
